**Notes forming part of the financial statements
for the year ended December 31, 2021**

1. About the Company

Capital Asset Management CJSC (the Company) is the first registered investment and pension fund manager in the Republic of Armenia. The Company was founded on October 18, 2012 and has been registered in the Central Bank of Armenia (CBA) as an investment fund manager with granted license number 1. The activity of the Company is regulated by CBA. The Company manages and administers assets held in unit funds. The financial statements of these entities are not included in these financial statements.

All Assets and Liabilities of the company are located in Armenia.

The only shareholder of the "Capital Asset Management" CJSC is Tigran Karapetyan.

The Company operates the following open ended voluntary pension and investment funds:

- CAM Government Securities Investment Fund
- CAMavor 1 PENSION FUND
- CAMavor 2 PENSION FUND
- CAM Bridge Fund I
- CAM Bridge Fund II
- Ararat Technology CAM-PI Fund 1

The legal address of the company is: Armenia, 0015, Yerevan, Argishti St., 7 Building.

The Company's registered office is 7 Argishti, 1st floor office 101, Yerevan, Republic of Armenia.

Average number of employees for the year ended 31 December 2021 was 6 (31 December 2020: 7).

Armenian business environment

The Company's operations are located in Armenia. Consequently, the Company is exposed to the effects of changes in the economic and financial markets of Armenia. Armenia continues economic reforms and development of its legal, tax, and regulatory frameworks as required by a market economy. The future stability of the Armenian economy is largely dependent upon these reforms and developments and the effectiveness of economic, financial, and monetary measures undertaken by the government. The financial statements reflect the Company's assessment of the impact of the Company's operations on the financial condition of the business environment. The future business environment may differ from management's assessment.

The widespread geographical spread of the new type of coronavirus (COVID-19) had a material impact on the Armenian economy. The severity of the epidemic continues to impact as well as the effectiveness of the measures taken to address the problem remains uncertain at this time.

The political situation in the Republic of Armenia still remains unstable, considering the war unleashed by Azerbaijan against the Artsakh Republic on September 27, 2020. The preconditions for political and economic crises led to a decrease in the general mood of investors and brought to an increase of uncertainty and vulnerabilities in financial markets.

Uncertainties caused by the unstable internal political situation led to an increase in interest rates on government bonds. Yields on long-term bonds have greatly increased. As a result, the actual return on investment was lower than planned.

Such an operating environment has a significant impact on the Company's financial situation. The Company takes the necessary measures to ensure the stability of the Company's operations, however, due to the unpredictability of developments, the Management does not able to make a reliable assessment of how such circumstances will affect the financial condition of the Company in the coming years.

**Notes forming part of the financial statements
for the year ended December 31, 2021**

2. Basis of preparation

These financial statements have been prepared in accordance with International Financial Reporting Standards, International Accounting Standards and Interpretations (collectively IFRSs).

The principal accounting policies adopted in the preparation of the financial statements are set out in note 16. The policies have been consistently applied to all the years presented, unless otherwise stated.

The financial statements are presented in Armenian Drams (AMD), which is also the Company's functional currency. Amounts are rounded to the nearest thousand, unless otherwise stated.

The preparation of financial statements in compliance with adopted IFRS requires the use of certain critical accounting estimates and judgments. The areas where significant judgments and estimates have been made in preparing the financial statements and their effect are disclosed in note 3.

Basis of measurement

The financial statements have been prepared on historical cost basis, except for financial assets at fair value through profit or loss that are measured at fair value.

Changes in accounting policies

a) New standards, interpretations and amendments effective from 1 January 2021

There are no new standards, interpretations and amendments, entered into force from 1 January 2021 and which had significant effect on the Company's financial statements.

b) New standards, interpretations and amendments not yet effective

There were no new standards, interpretations and amendments that are issued but not yet effective that will have or may have an impact on the Company's future financial statements.

3. Critical Accounting Estimates and Judgements

The Company makes certain estimates and assumptions regarding the future. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual outcome may differ from these estimates and assumptions. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Estimates and assumptions

Going concern

Management has prepared the financial statements on a going concern basis. In making this assessment, management considered the Company's financial condition, current intentions, operating profitability, and availability of financial resources.

The management of the Company does not expect a discrepancy in the assessment of the going concern basis, due to positive expectations on the of the activation of the investment market.

Factors affecting going concern

A significant factor influencing the company's going concern basis is the ongoing global health emergency due to the coronavirus ("COVID-19 outbreak") and the risks to the international community, as the virus has spread throughout the world, including in the Republic of Armenia.

**Notes forming part of the financial statements
for the year ended December 31, 2021**

In addition, the war unleashed by Azerbaijan against the Artsakh Republic on September 27, 2020, created significant preconditions for political and economic crises, which in turn indirectly affected the Company's activities.

The course of the epidemic, as well as the increase in political risks following the war, have led to a general economic downturn, as well as an increase in uncertainty about the future. The uncertainty partly affects the corporate bond markets, as well as the willingness of investors, to operate actively in the financial markets.

The decrease in the assets of the investment fund in 2021 compared to 2020 in absolute terms was mainly conditioned by the withdrawal of customers' funds, while the relatively active and logical investment policy pursued by the Company in the current crisis situation made it possible to avoid large losses. It affected the return on funds, the attraction of new customers, and the return on equity. As a result, the Company ended 2021 with a cumulative loss of 251 thousand AMD.

The above mentioned circumstances have led to a reduction in financial investments, as a result of which the Company's management fee in 2021 has significantly decreased compared to 2020.

The company has adopted a moderately active policy at this stage and after making assessments, the Company's management has a reasonable expectation that the Company is able to continue its operational existence in the foreseeable future. The Company, therefore, continues to adopt the going concern basis in preparing its financial statements, therefore these financial statements do not include any adjustments that would result if the Company was unable to continue as a going concern.

Fair value measurement

A number of assets and liabilities included in the Company's financial statements require measurement at, and/or disclosure of, fair value.

The fair value measurement of the Company's financial and non-financial assets and liabilities utilizes market observable inputs and data as far as possible. Inputs used in determining fair value measurements are categorized into different levels based on how observable the inputs used in the valuation technique utilized are (the 'fair value hierarchy'):

- *Level 1:* Quoted prices in active markets for identical items (unadjusted)
- *Level 2:* Observable direct or indirect inputs other than Level 1 inputs
- *Level 3:* Unobservable inputs (i.e. not derived from market data).

The classification of an item into the above levels is based on the lowest level of the inputs used that has a significant effect on the fair value measurement of the item. Transfers of items between levels are recognized in the period they occur. The Company measures fund units at fair value (Note 8).

4. Financial instruments - Risk Management

The Company is exposed through its operations to the following financial risks:

- Credit risk,
- Fair value or cash flow interest rate risk,
- Liquidity risk,
- Foreign exchange risk.

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments.

**Notes forming part of the financial statements
for the year ended December 31, 2021**

This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous periods.

(a) Principal financial instruments

The principal financial instruments used the Company, from which financial instrument risks arise, are as follows:

- Financial assets at fair value through profit or loss
- Receivables
- Cash and cash equivalents
- Payables.

(b) Financial instruments by category

Financial asset	Fair value measurement		Amortized cost	
	2021 AMD'000	2020 AMD'000	2021 AMD'000	2020 AMD'000
Cash and cash equivalents	-	-	20	114
Financial assets at fair value through profit or loss	234,788	273,516	-	-
Trade receivables	-	-	3,170	2,139
Total	234,788	273,516	3,190	2,253
Financial liabilities				
Trade payables	-	-	1,486	719
Total	-	-	1,486	719

(c) Financial instruments not measured at fair value

Financial instruments not measured at fair value include cash and cash equivalents, trade receivables and trade payables.

Due to their short-term nature, the carrying value of cash and cash equivalents, trade receivables and trade payables approximates their fair value.

**Notes forming part of the financial statements
for the year ended December 31, 2021**

(d) Financial instruments measured at fair value

Financial Instruments fair value hierarchy is presented below:

December 31	Level 2	
	2021 AMD'000	2020 AMD'000
Financial assets at fair value through profit or loss	234,788	273,516
	<u>234,788</u>	<u>273,516</u>

Appendix A details the fair value hierarchy and significant unobservable inputs relating to valuation techniques that are included in Level 3 of the fair value hierarchy.

During the reporting period there were no changes in the levels. The valuation techniques and significant observable inputs used in determining the fair value of financial assets at fair value through profit or loss, as well as the primary observable inputs and fair value relationships are presented below.

Financial instrument	Measurement method
Financial assets at fair value through profit or loss	Units measured at fair value of respective funds as at the reporting date published by the Funds.

There were no changes in the valuation technique used to measure the fair value during the reporting period.

Common goals, policies and processes

Company management has overall responsibility for risk management, goals and policies. The management receives monthly reports from the Company's chief accountant, thereby verifying the effectiveness of the processes and compliance with the stated goals and policies.

The management aims to define policies that minimize risk while avoiding the Company's competitiveness and flexibility. Details of this policy are described below.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company bears credit risk primarily on investing activities and bank balances. The Company seeks to control its credit risks by applying monitored investment strategy as well as reasonable judgement in selection of servicing banking partners. The Company may enter into secured financing transactions such as sale and repurchase agreements or purchase and resale agreements. For secured transactions involving repurchase and resale agreements the Company is permitted to sell or repledge the securities held as collateral and use these securities to enter into securities lending arrangements or to deliver to counterparties to cover any short positions.

The Company has policies and procedures for the management of credit exposures (for recognised financial assets and unrecognised contractual commitments).

The maximum exposure to credit risk is generally reflected in the carrying amounts of financial assets in the statement of financial position and in unrecognised contractual commitments. The impact of possible netting of assets and liabilities to reduce potential credit exposure is not significant.

As at December 31, 2021 and 2020 credit risk exposure of financial assets are presented in the table below:

Capital Asset Management CJSC

Notes forming part of the financial statements for the year ended December 31, 2021

	2021 AMD'000	2020 AMD'000
Cash and cash equivalents	20	114
Financial assets at fair value through profit or loss	234,788	273,516
Trade receivables	3,170	2,139
	<u>237,978</u>	<u>275,769</u>

Cash at bank

The Company believes that the risk of cash at bank can be deemed as insignificant, since the financial institutions selected for investment of the Company's funds are reliable and authoritative.

A significant amount of cash is held with the following institutions:

	2021 AMD'000	2020 AMD'000
Bank 1	13	2
Bank 2	7	112
	<u>20</u>	<u>114</u>

Liquidity risk

Liquidity risk arises from the Company's management of own funds. It is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due.

The factors which impacts on the position of the cash and cash flows are including investment activities with securities, temps of subscriptions and maturity of shares. The combination of other factors can cause essential fluctuations on cash position of a certain period of time.

The Company's policy is to ensure that it will always have sufficient cash available to meet its liabilities when they become due. To achieve this aim, it seeks to maintain cash balances (or agreed facilities) to meet expected requirements in reasonable timeframe.

The following table sets out the contractual maturities (representing undiscounted contractual cash-flows) of financial liabilities:

Up to 3 months	31 December 2021 AMD'000	31 December 2020 AMD'000
Trade payables	<u>1,486</u>	<u>719</u>

Fair value or cash flow interest rate risk

The Company is exposed to the risk that the fair value or income / future cash flows of its financial instruments portfolio will fluctuate as a result of fluctuations in market interest rates. In respect of the Company's interest-bearing financial instruments, the Company's policy is to transact in financial instruments that mature such that they best correspond to the maturity of financial liabilities. Nevertheless, the impact of interest rate risk can be high due to fluctuations in the prevailing levels of market interest rates.

Foreign Exchange risk

Capital Asset Management CJSC

Notes forming part of the financial statements for the year ended December 31, 2021

Currency risk arises from recognized financial assets & liabilities that are not underlined in the Company's functional currency. The Company has a policy to manage the impact of foreign exchange risk on the Company in accordance with the terms of currency diversification set out in the Fund's rules. As of the reporting date, the impact of foreign exchange risk on the Company is due to USD underlined corporate securities in the investment portfolio.

The table below shows the impact of exchange rate fluctuations as of the reporting date.

	31.12.2021	31.12.2020
Financial assets measured at fair value through profit and loss	AMD'000	AMD'000
USD	78,398	80,643
Net currency position	78,398	80,643

As of the reporting date, the effect of a 10% devaluation of the US dollar against the AMD on financial instruments denominated in US dollars (if other data remained unchanged) would result in an increase in net profit for the year (after tax) by 6,429 thousand drams (6,613 thousand drams in 2020) and 10 Impact of% depreciation on annual profit (after tax) decrease in net assets by the same amount.

Capital Risk management

The Company manages its capital to ensure that the Company will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of the debt and equity balances. The CBA sets and monitors capital requirements for the Company. Under the current capital requirements set by the CBA, voluntary and pension fund managers have to maintain a minimum share capital of AMD 200,000 thousand

5. Fund management fees

	2021	2020
	AMD'000	AMD'000
Management fees from investment funds	22,668	33,681
Management fees from pension funds	3,321	3,106
	25,989	36,787

Company revenue from the fund management services is recognized on a daily basis and calculated base on net active values of funds.

The Company typically collects revenue from management services within the following month.

6. Other operating expenses

	2021	2020
	AMD'000	AMD'000
Employee benefit expenses	24,209	26,018
Audit and other consulting services	6,756	6,600
Short-term lease expenses	5,640	5,640
Servicing and maintenance	3,659	3,856
Depreciation and amortization	1,361	1,918
Communication expenses	886	816

Capital Asset Management CJSC

Notes forming part of the financial statements
for the year ended December 31, 2021

Other operating expenses	<u>1,772</u>	<u>3,516</u>
	<u>44,283</u>	<u>48,364</u>

Capital Asset Management CJSC

Notes forming part of the financial statements
for the year ended December 31, 2021

7. Income tax

	2021 AMD'000	2020 AMD'000
Deferred income tax reimbursement/(expense)	(1,543)	114
Total income tax reimbursement /(expense)	(1,543)	114

The reasons for the difference between the actual tax expenses of the year and the profit tax rate determined by Tax Codex of the Republic of Armenia are as follows:

	2020 AMD'000	2019 AMD'000
Profit/(loss) before tax	(20,029)	8,212
Income tax at tax rate of 18.0% (2020 - 18.0%)	(3,605)	1,478
Effect of non-deductible/(non-taxable income), net	1,168	(3,229)
Tax loss carry forward not recognised	3,980	-
Utilization of previous year tax losses	-	1,637
Total effective tax expense /(income)	1,543	(114)

8. Financial assets at fair value through profit or loss

	2021 AMD'000	2020 AMD'000
Units held in funds under management	234,788	273,516
	234,788	273,516

9. Deferred tax assets

Deferred tax is calculated in full on temporary differences under the liability method using a tax rate of 18% (2020: 18%). The change of deferred tax assets are as following.

As at 31 December 2021 the Company have not recognized deferred tax of AMD 3,980 thousand (2020: AMD 19,567 thousand) with respect to unrecognised tax losses, which can be utilised during 2022-2026.

The movements in deferred tax assets and liabilities (prior to the offsetting of balances within the same jurisdiction as permitted by IAS 12) during the period are shown below.

	Balance as at 31.12.2020	2020 recognized in profit or loss	Balance as at 31.12.2021
Provisions	1,548	8	1,556
Property and equipment	(26)	26	-
<i>Tax loss carry-forward</i>	4,276	(1,576)	2,700
	5,798	(1,542)	4,256

Capital Asset Management CJSC

Notes forming part of the financial statements for the year ended December 31, 2021

	Balance as at 31.12.2019	2020 recognized in profit or loss	Balance as at 31.12.2020
Provisions	1,499	49	1,548
Property and equipment	(62)	36	(26)
<i>Tax loss carry-forward</i>	4,247	29	4,276
	5,684	114	5,798

10. Other assets

	2021 AMD'000	2020 AMD'000
Receivables from funds	3,170	2,139
Financial assets at amortised cost	3,170	2,139
Other	555	522
	3,725	2,661

The carrying value of trade and other receivables measured at amortised cost approximates its fair value.

The Company uses the simplified approach of IFRS 9 to estimate expected credit losses on trade receivables using an estimate of lifetime expected credit losses. To measure credit solvency losses on a collective basis, receivables are grouped based on similar risk levels and maturities.

The Company's trade receivables are current and have a maturity of up to 30 days.

As of December 31, 2021 and December 31, 2020, the effect of non-collection of receivables is not material.

11. Payables

	2021 AMD'000	2020 AMD'000
Trade payables	1,486	719
Financial liabilities at amortised cost	1,486	719
Accruals on vacation leave	6,146	5,600
Accruals on audit	2,496	3,000
Other payables	655	20,553
	10,783	29,872

12. Share capital and reserves

Issued share

The declared, issued and outstanding share capital consists of 21,000 ordinary shares (21,000 in 2020). As of December 31, 2020, the nominal value of the share was 9,900 drams (9,900 drams in 2020).

The number of shares announced by the company is 30,000 shares. Holders of ordinary shares have the right to receive the declared dividends and to vote at the General Meetings of the Company - one share by one vote.

**Notes forming part of the financial statements
for the year ended December 31, 2021**

Dividends

Dividends payable are limited by the amount of the maximum retained earnings of the Company as defined by the legislation of the Republic of Armenia. No dividends were declared in 2021. During 2020, the Company declared and paid dividends of 42,000 thousand AMD

13. Related party transactions

In accordance with IAS 24 Related Party Disclosures, parties are considered to be related if one party has ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The ultimate controlling party is Tigran Karapetyan (100% shareholder).

Transactions with related parties at the end of the reporting period are as follows:

Key Management Personnel Compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, including the Company's Director. The costs related to remuneration of key management personnel are presented below.

	2021 AMD'000	2020 AMD'000
Salary, other compensation	<u>10,432</u>	<u>10,093</u>

14. Contingent Liabilities

As of December 31, 2021 the Company had no liabilities related to capital investments (as well as, as of December 31, 2020)

As of December 31, 2021 the Company has provided no guarantees regarding repayment of liabilities of any party (the same applies to 31.12.2020)

As of December 31, 2021 there were no legal actions against the Company (the same applies to 31.12.2020).

15. Event after the reporting period

On February 24, 2022, Russia launched a large-scale military operations against Ukraine. In order to resist Russia, the EU and the United States, and other countries around the world, have imposed economic and political sanctions, as a result of which the Russian economy is facing significant issues. At present, the course of the military operations, the impact of sanctions, and the extent of the consequences are unpredictable.

Taking into consideration of Russia's political and economic influence on the Armenian economy and investment field, as well as the fact that Armenia is a member of the EEU, the current situation may indirectly affect the stability of Armenia's financial and economic systems. Given the unpredictability of these circumstances and their impact,

At the moment, the Company finds it difficult to assess the impact of the latter on the results of the Company's future activities, financial condition, and liquidity.

Notes forming part of the financial statements
for the year ended December 31, 2021

16. Accounting policy

Income from main activity

Fund management fees are recognised based on the net asset values of investment funds. Management fees are recognised based on the applicable service contracts, usually on a time-proportion basis. Asset management fees related to investment funds are recorded proportionately over the period the service is provided.

Asset management and administration fees relate to fees earned on fiduciary activities where the Company holds or invests assets on behalf of its clients, and provides other asset-based financial services. These fees are based upon daily balances of client assets invested in these funds. The fair values of client assets included in funds are based on quoted market prices and other observable market data.

Foreign currency transactions

Transactions in foreign currency are converted into the functional currency at the closing exchange rate as of the day of the transaction, and at the average exchange rate announced by the CBA in case of closing price absence.

Monetary assets and liabilities in foreign currency are converted into the functional currency at the exchange rate as of the last day of reporting period.

Non-monetary assets and liabilities in foreign currencies that are measured at fair value are recalculated at the current exchange rate at the date the fair value of the functional currency is determined.

Exchange differences arising from the foreign currency items account are recognized in profit or loss as net gains/losses on foreign exchange differences, except for financial instruments measured at fair value through profit or loss that are recognized at fair value, the element of net profit or loss arising from the revaluation of financial instruments measured through profit or loss.

Stock transactions and investment income

Stock transactions are accounted for at the date of the transaction (sale or purchase of securities). Interest income is accounted on an accrual basis. Dividends are accounted on the date of the previous dividends. Value of securities is calculated based on weighted average cost.

Financial instruments

The Company recognizes the financial assets and liabilities in the statement of financial position when it becomes a party to the financial instrument contract. Regular way purchases and sales of financial assets and liabilities are accounted for at the end of the reporting period. Regular way purchases or sales of financial instruments are the purchase or sale of financial assets that require delivery of the assets within the time frame established generally by regulation or convention in the marketplace concerned.

Financial assets or liabilities are initially measured at fair value. In the case of financial assets or liabilities that are not classified in the group of financial instruments measured at fair value through profit or loss, the transaction costs are added (or removed) to the fair value, which are directly attributable to the purchase or issue of a financial asset or liability. Transaction costs that are directly attributable to acquisition of financial assets or financial liabilities "measured at fair value through profit or loss" are recognized immediately in profit or loss.

Financial assets

Financial assets are classified in the following categories: (a) financial assets measured at fair value through profit or loss (FVTPL); (b) financial assets measured at fair value through other comprehensive income (FVOCI); c) financial assets measured at amortized cost. The classification

**Notes forming part of the financial statements
for the year ended December 31, 2021**

depends on the nature of the cash flows resulting from the financial assets and the business model, under which the asset is held and designated at the time of initial recognition.

Financial assets measured at fair value through profit or loss.

Financial asset is classified as "measured at fair value through profit or loss" if it is classified neither as measured at amortized cost (as described below) nor as measured at FVOCI (as described below). Additionally, at initial recognition, the Company may irrevocably designate any financial asset (which meets the criteria for being measured at amortized cost or at FVOCI) as measured at FVTPL, if this eliminates or essentially reduces the accounting mismatch that could otherwise have arisen.

A financial asset is classified as measured "at amortized cost" if it complies with the following two conditions and has not been designated as measured at FVTPL:

- It is held under a business model, which aims at holding assets to collect contractual cash flows; and
- Its contractual terms give rise to cash flows on the specified dates, which are solely interest payments on principal and outstanding principal.

Financial assets, which are debt instruments and are not classified as measured at FVPOL, are subject to impairment test using the expected credit loss model. According to this model, a credit loss provision should be recognized in the amount of expected credit losses (ECL) during 12 months after the reporting date. However, if the instrument's credit risk has significantly increased since its initial recognition, the provision should be recognized for the whole life of the instrument in the amount of ECL.

Financial liabilities

Financial liabilities are classified as measured "at fair value through profit or loss" (FVTPL) or as measured "at amortized cost".

Financial liabilities measured at amortized cost

Other financial liabilities are subsequently measured at amortized cost using the effective interest method, recognizing the interest expense on the basis of efficiency.

Property and equipment

Property and equipment are measured at cost less accumulated depreciation and impairment losses. Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

The estimated useful lives for the current and comparative periods are as follows:

Computer equipment - 1-5 years

Household and office equipment, other fixed assets - 5-10 years:

Externally acquired intangible assets

Externally acquired intangible assets are initially recognised at cost and subsequently amortised on a straight-line basis over their useful economic lives.

Software- 10 years.

Notes forming part of the financial statements
for the year ended December 31, 2021

Dividends

Dividends are recognized when they become legally payable.

Deferred taxation

Recognition of deferred tax assets is restricted to those instances where it is probable that taxable profit will be available against which the temporary difference can be utilized.

The amount of the deferred asset or liability is determined using tax rates that are expected to apply when the deferred tax liabilities/(assets) are settled/(recovered).

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past events and it would appear, that the Company will be required to meet the liability and the amount of the liability can be assessed accurately.

Securities purchased and redeemed under the REPO agreement

Securities received under REPO agreements shall be credited off-balance sheet as collateral security. Amounts paid for securities received under repurchase agreements are credited as secured loans. Interest earned on *that* basis is recognized on an accrual basis in profit or loss and is included in other operating income. Securities issued under REPO agreements are accounted for in their balance sheet. The amounts received for securities issued by the REPO agreements are recorded as received loans. Interest paid on them is recognized on an accrual basis in the profit or loss as interest expenses.
